

BREEZE

environmental data solutions. actionable insights. a healthier life.

Air pollution causes

\$1.6 trillion

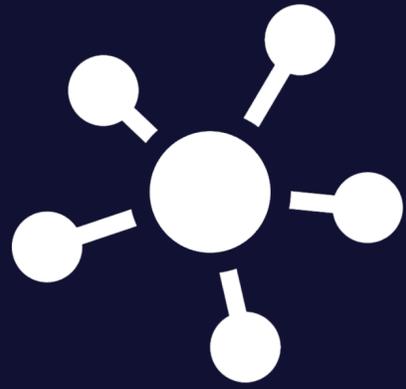

yearly damage to
European economies,
WHO says.

Cities struggle to **adapt** to changing environments. They are required to **report** some environmental information and need a broad **data foundation** for adaption activities.

Companies and employers need to achieve and maintain a **green image**. Optimizing their office air quality they can even obtain **productivity gains** and **reduce sick leave**.

affordable
sensors.

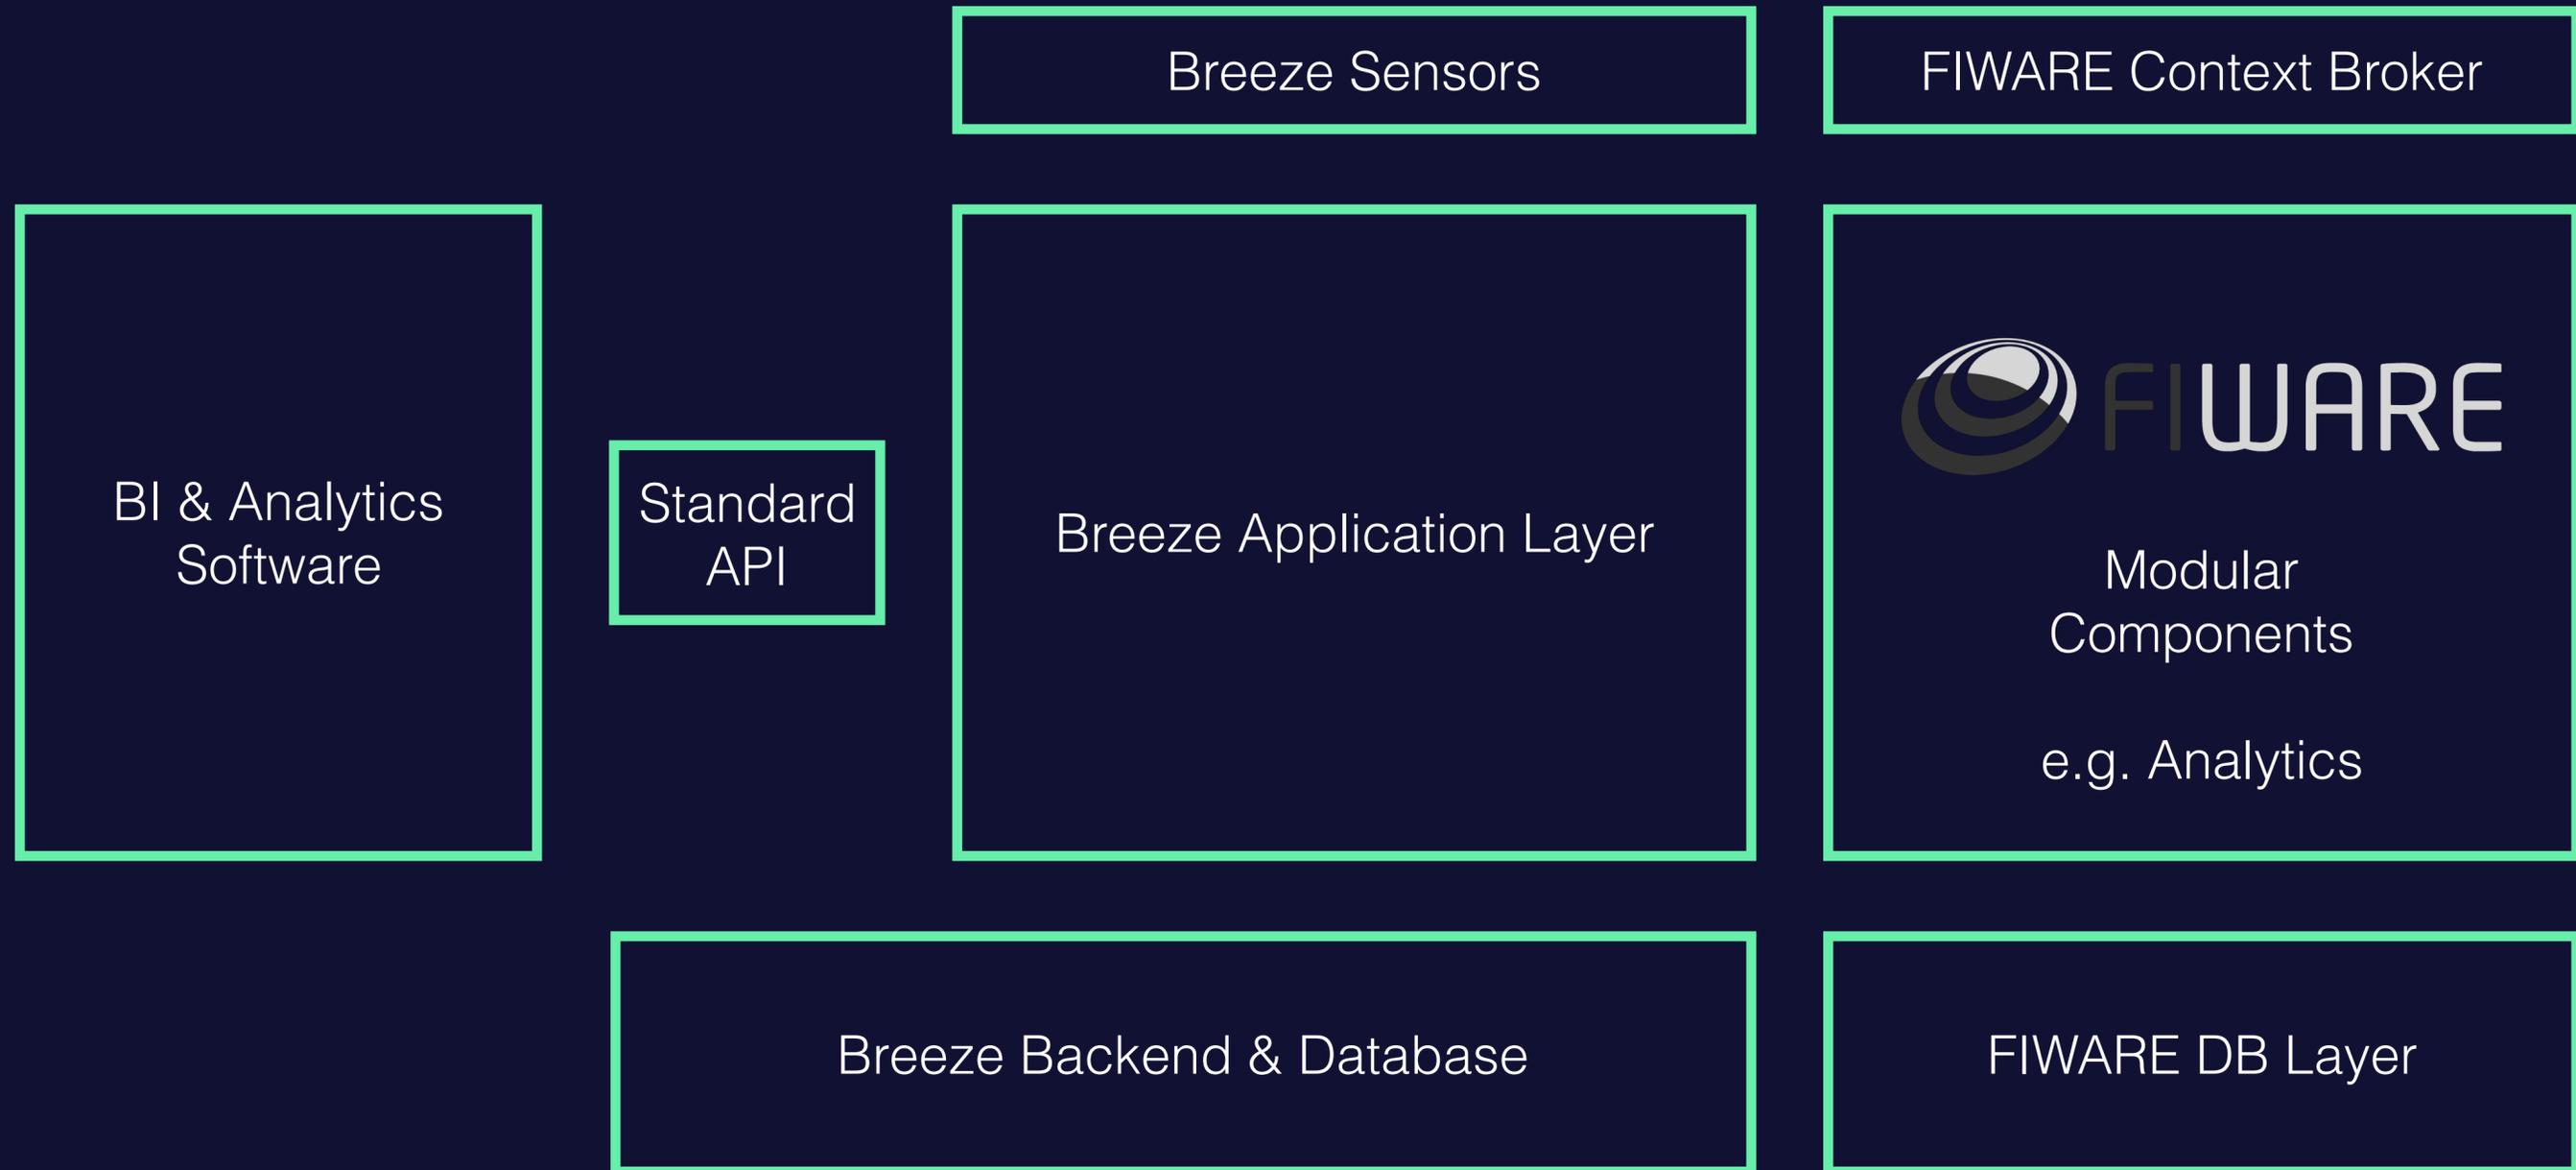

predictive
analytics.

prescriptive
action planning.
